

Transforming waste. Creating value. Building tomorrow.

COMPANY OVERVIEW

KODA Environmental develops and manages comprehensive environmental solutions for industrial and commercial operations nationwide. We identify opportunities within complex waste streams, build cost-effective recovery and recycling programs, and manage the logistics, vendors and infrastructure required to execute them. Engagements range from a single material stream at one facility to a full multi-site portfolio — the scope is the customer's to set.

DIFFERENTIATORS

- Every stream evaluated in order — the outlet follows the material.
- Material-First™ methodology: eliminate, reduce, reuse, recycle/recover, treat, then dispose.
- Material Passport™ — a living profile for every stream: source, cost, outlet, impact, year-on-year movement.
- Opportunity Score™ — every stream scored on six factors, giving a prioritized order of attack.
- Reporting built to survive an audit, with the basis recorded beside every figure.
- Disposal placed at facilities that have been through CHWMEG review.
- Nationwide reach, with one account structure wherever the sites are.
- Scope set by the customer — one stream, one site, or every site.

CORE SERVICES

- Hazardous waste management
- Non-hazardous waste management
- Recycling
- Resource recovery
- Beneficial reuse
- Surplus food donation & recovery
- Emergency and unplanned waste response
- Tier II, TRI and state waste reporting
- Phase I & Phase II site assessments
- Sustainability, ESG and diversion reporting
- Environmental audits
- Vendor management
- Industrial services
- Transportation coordination
- Cost reduction programs
- National account management

INDUSTRIES SERVED

Manufacturing · Automotive · Aerospace · Food & Beverage
· Chemical Processing · Distribution · Healthcare · Energy ·
Government · Commercial Facilities

HOW WE ENGAGE

Every engagement begins with the KODA Operational Review™ — a structured evaluation of the facility, material streams, current vendors, regulatory obligations and all-in cost. Recommendations follow from that data, and what comes back is a Passport per stream, a scored order of priority and one reporting format across every site.
